

#### **MERIDIAN 209 REMOTE MASTER CONTROL**

All products in the Meridian 200 Series are designed to be remotely controlled from the Meridian 209. From the listening position, this robust and convenient handset will operate every function from direct selection of any CD track or preselected FM station to control of up to 8 inputs, volume and mute levels.

## **MERIDIAN 209 REMOTE MASTER CONTROL**

The Meridian 209 operates to the standard RC5 code signals by infra red light. This means that it will not interfere with other brands of TV and video remote control. It can be used with individual products such as the Meridian 207 Compact Disc Player, the Meridian 201 Remote Control Preamplifier and other forthcoming products in the 200 Series. The layout of controls is divided into three bands. Source controls at the top e.g. selection of TV sound, CD player, tape, etc. Operating controls in the centre e.g. play, stop, pause, etc. and at the bottom, direct selection of CD tracks, FM stations, etc.

Operation of keys on the 209 is witnessed by a light which also provides indication of battery life. Under normal conditions, the 209 should operate without battery replacement for at least a year.

Used with the Meridian 207 Remote Control Preamplifier it can even be carried from room to room to operate separate music systems.

The 209 is housed in a strong diecast metal case finished in black satin enamel.

### **TECHNICAL SPECIFICATION**

<b>Signal Code</b>	Philips RC5
<b>Power required</b>	9V PP3 battery or similar
<b>Keys</b>	Source keys 8 plus standby (off) Control keys 12 Track selection keys 16
<b>Dimensions</b>	159mm × 163mm × 22mm
