

210 STREAMER

OVERVIEW

The Meridian 210 Streamer is a high-quality audio source which allows streaming services used on smartphones, tablets and other devices to be played on your audio system. It enables music accessed from today's most popular streaming platforms to be integrated seamlessly with Meridian systems.

The 210 can be attached directly to a pair of DSP loudspeakers or it can be connected to any system with a SpeakerLink input. In all cases, volume and playback controls are synchronised between streaming apps and the Meridian system.

PRODUCT HIGHLIGHTS

The 210 supports Bluetooth, Spotify Connect, Apple Airplay and it is a Roon Ready device. It also supports DLNA/UPnP so that the contents of any USB storage connected to the 210 can be made available to networked digital media players and renderers.

- Devices can stream to the 210 via Bluetooth or WiFi and, by remembering the last eight Bluetooth devices used, the 210 allows multiple users to enjoy their favourite music easily and without fuss.
- Supporting wired and WiFi network connections, the 210 offers great flexibility in regard to installation and product location.
- Bluetooth set-up and configuration are available.
- An app is provided for set-up and playback operation.
- Featuring a built-in MQA decoder, the 210 fully supports Master Quality Authenticated encoded music playback, guaranteeing a studio master quality experience.

USER FEATURES

- Usable without the need for any additional “core” device.
- Spotify Connect integrated into the set-up app provided with the product.
- Bidirectional integration between streaming apps and Meridian products, linking volume and playback controls, such as “Play”, “Stop/Pause” and “Skip” – making control functionality consistent and predictable whether it is carried out via the app or on the Meridian system.
- Front panel indicators for Bluetooth, Network, Standby, SpeakerLink In and MQA status.
- Pairing push-button on rear-panel for simple Bluetooth connection.
- Supports pairing of multiple Bluetooth devices.
- Sample rate and bit-depth up to 96kHz at 24bit.
- Audio decoding: AAC, AIFF, MP3, FLAC, WAV, WMA, Apple Lossless, OGG, Monkey’s, MQA Decoded and unfolded 24bit/96Khz audio out via I2S.

TECHNOLOGIES

MHR

Meridian High Resolution [MHR] allows the secure movement of high resolution digital audio, without degradation or loss in quality.

SPEAKERLINK

Traditional audio systems often require large, expensive cables to maintain their performance. Meridian’s SpeakerLink uses an “Ethernet style” cable that delivers pristine digital sound and control down a single cable between Meridian components. The result is simple, unobtrusive, and cost-effective cables that are easy to install.

MQA

Master Quality Authenticated (MQA) is a revolutionary end-to-end technology that delivers master quality audio in a file that’s small enough to stream or download.

REAR PANEL LAYOUT

CONSTRUCTION

The 210 is housed in a half-width, 1U tall enclosure. It is comprised of an Aluminium case fitted with non-metallic panels to allow for WiFi functionality without an external antenna.

The 210 shares its form factor with some other Meridian 200 series products, such as the Meridian 218. An optional rack-shelf is available which can accommodate two of any such units.

SPECIFICATION

CONNECTIONS

- Power input (IEC “cloverleaf” connector)
- USB input (USB-A connector)
- 1 x SpeakerLink input (RJ45)
- 2 x SpeakerLink output (RJ45)
- 1 x co-ax digital aux output (RCA phono)
- Network socket for Ethernet connection (RJ45)
- Maintenance socket (mini-USB connector)

DISPLAY/CONTROL

- Front-panel indicator LEDs for Bluetooth, Network, SpeakerLink and MQA
- Rear-panel indicator for power
- Rear-panel pairing button

DIMENSIONS/WEIGHT

- HEIGHT: 42mm [1.65in]
- WIDTH: 204mm [8.0in]
- DEPTH: 150mm [5.9In] plus connectors
- WEIGHT: 0.66kg (1.46lb)

POWER

- High performance power supply: 100V ac 50/60 Hz | 110-120V ac 50/60Hz | 220-240V ac 50/60Hz
- Maximum power consumption: 12W
