MERIDIAN M3100 SPEAKERS

Just out from British audio legend Meridian are the M3100 active analogue bookshelf loudspeakers that can be used as surrounds in a multi-channel system or on their own in a smaller room.

Meridian claims that the M3100s are tonally similar to other Meridian loudspeakers

LEFT: The Meridian DSP3100 bookshelf speaker

but their distinctive cabinets are made from braced wood with piano-lacquered ends and aluminium side panels which are bonded for rigidity. The M3100 is also available in a DSP version.

The M3100 is already available at £1845 a pair with matching stands at £330 a pair. The M3100 HC horizontal centre speaker with twin bass drivers is £1565.
