PRESS RELEASE

Meridian Audio to Introduce Three New Digital Active In-wall Loudspeakers

Meridian Audio has introduced a new range of Digital Active In-wall Loudspeaker models, initially consisting of two full-range loudspeakers and a subwoofer. The first models in the new range include the DSP520, the DSP630 plus an in-wall subwoofer, the DSW600.

The sonic inspiration for the in-walls was development work on the unique M6 loudspeaker released earlier in 2012. This tall, conical loudspeaker features a 140mm bass driver and an 85mm wide-range driver, and the same drivers are used in the in-wall systems, giving the DSP520 a comparable performance and sound to the M6, while the larger unit provides even more impressive performance with higher sound pressure levels and extended bass. The subwoofer is designed to directly complement the full range loudspeakers and integrate with them to form a 'super-speaker'.

Key Points for Editors

- Ultra-narrow (200mm) design delivers full DSP loudspeaker performance in-wall
- Back-box and frame system allow precise positioning and adjustment and includes Meridian's innovative SpeakerLink technology for simple integration with the rest of the system.
- Loudspeaker array is built into self-contained enclosure that mounts into back-box
- DSP-based design delivers superior performance to conventional designs – equivalent to an enclosure of eight times the physical volume
- All aspects of the design including baffle and grille have been developed for maximum dispersion and listening area plus minimum unwanted diffraction.
- When combined with the Media Source 200, the In-wall loudspeakers provide an elegant Digital Media System zone.

UK Prices to be announced.

RELEASE ENDS

Embargo: September 6th 2012

ABOUT MERIDIAN AUDIO

Meridian is based near Cambridge, UK, and was founded in 1977 by Bob Stuart and Allen Boothroyd. With over 35 years' history of innovation and development of uncompromised consumer home entertainment systems offering exceptional performance, this award-winning company is widely recognised as a world leader in high-quality audio and video reproduction. Meridian developed the first audiophile CD player, the world's first consumer digital surround controller, and the MLP lossless packing system included in Blu-ray Disc. The company's optical disc players, DSP-based loudspeakers, video projectors, and scalars are unique in the industry, maintaining a super-quality digital signal throughout the path from the studio to the home, using advanced digital signal processing to deliver both a sweet, natural sound and smooth, crystal-sharp images with true cinematic realism. In late 2008, Meridian acquired leading networked media server developer Sooloos, and today the Meridian Sooloos Digital Media System offers a unique combination of superb digital audio quality with the world's most innovative, flexible and intuitive touch screen.
