PRESS RELEASE

Meridian Introduces Media Source 200 Compact Audio Endpoint for Meridian's Digital Media System

Meridian Audio has announced the introduction of its all-new Media Source 200, a compact audio endpoint for Meridian's Digital Media System. It also provides a simple solution for adding additional rooms to an existing Meridian Digital Media System.

Media Source 200 can access any of the facilities of the connected system, including playing back selections from the media library, internet radio, and Rhapsody (where available). The Media Source 200 is exceptionally simple to use and can be operated from a Meridian Control 15, or wirelessly from the free iPhone or iPad app – or any other available system controller.

Solidly built and hand-assembled in Meridian's Cambridgeshire factory, the Media Source 200 is a new compact industrial design with an aluminium enclosure which can be mounted behind a DSP loudspeaker, including Meridian's new line of in-wall models.

Key Points for Editors

- Compact single-zone source provides access to a Meridian Digital Media System library
- Managed and controlled from any Control attached to the Digital Media System network, including wirelessly via iPhone and iPad apps
- Proprietary Meridian audio enhancement technologies deliver the very best audio quality from your music collection
- Analogue audio output for simple connection of a Meridian Digital Media System to a hi-fi or multi-zone distributed audio system

- Connects internet radio services and Rhapsody (where available) to the zone in which it is used
- Meridian SpeakerLink for direct connection to a pair of Meridian's DSP Loudspeakers, including the new range of In-wall Loudspeakers
- S/PDIF Optical digital audio output for connection to digital surround receivers or other devices
- Built-in infrared receiver allows control of your Meridian system
- Employs DHCP for setup-free connection to the network and includes automatic discovery for integration with other components.

Meridian Media Source 200 Digital Media System Single-Zone Source. UK Suggested Retail Price £499.00.

ABOUT MERIDIAN AUDIO

Meridian is based near Cambridge, UK, and was founded in 1977 by Bob Stuart and Allen Boothroyd. With over 35 years' history of innovation and development of uncompromised consumer home entertainment systems offering exceptional performance, this award-winning company is widely recognised as a world leader in high-quality audio and video reproduction. Meridian developed the first audiophile CD player, the world's first consumer digital surround controller, and the MLP lossless packing system included in Blu-ray Disc. The company's optical disc players, DSP-based loudspeakers, video projectors, and scalars are unique in the industry, maintaining a super-quality digital signal throughout the path from the studio to the home, using advanced digital signal processing to deliver both a sweet, natural sound and smooth, crystal-sharp images with true cinematic realism. In late 2008, Meridian acquired leading networked media server developer Sooloos, and today the Meridian Sooloos Digital Media System offers a unique combination of superb digital audio quality with the world's most innovative, flexible and intuitive touch screen.
