Meridian Introduces the Media Source 600

A single-zone source that enables simple connection of a Meridian Sooloos Digital Media System to a hi-fi or multi-zone distributed audio system.

Press release

The new Meridian Media Source 600 is an audio endpoint for a single Meridian Sooloos zone, designed to make it simple to integrate Meridian Sooloos in to any music or media system through a host of high-quality analogue and digital audio connections.

Linked to a Meridian Sooloos network, Media Source 600 delivers a full suite of Meridian's audio enhancement technologies, ensuring it always performs as a source of the highest possible sound quality in any type of audio system.

Featuring an entirely new industrial design, Media Source 600 is hand-assembled in Meridian's Cambridgeshire factory and finished using glass and bead-blasted, naturally anodised silver aluminium. From any of the finished surfaces it is impossible to see a single fixing or screw, creating an elegantly smooth finish.

Digital output connections, including S/PDIF and Meridian SpeakerLink, mean that Media Source 600 can be connected to digital surround receivers or stand-alone D/A converters or, for the ultimate in performance, directly with a pair of Meridian's DSP Loudspeakers.

Key Points for Editors

Media Source 600 is a simple yet high-performance way to add the rich user experience of Meridian Sooloos to any existing hi-fi system, bringing with it all of your digital music, internet radio and Rhapsody (where available).

An audio endpoint for a single Meridian Sooloos zone with high-quality analogue and digital output connectivity; connects Meridian Sooloos to any hi-fi, audio or music system.

Simple to use and easy to control, Media Source 600 can be managed from any Control on the Sooloos network including wirelessly from the free Sooloos iPhone/iPad app.

Designed and manufactured by Meridian, Media Source 600 is crafted using authentic, natural materials – aluminium and glass – and is assembled by hand to ensure the best finish quality.

Whether using a single Media Source 600 for a one-zone system or multiple units to build a multi-zone system, Media Source 600 is network-configured automatically via DHCP.

Meridian Audio Media Source 600

UK Suggested Retail Price £ 1,750.00

Available August 2010

About Meridian Audio Limited

Meridian is based near Cambridge, UK, and was founded in 1977 by Bob Stuart and Allen Boothroyd. With over 30 years' history of innovation and development of uncompromised consumer home entertainment systems offering exceptional performance, this award-winning company is widely recognized as a world leader in high-quality audio and video reproduction. Meridian developed the first audiophile CD player, the world's first consumer digital surround controller, and developed the MLP lossless packing system included in Blu-ray Disc. The company's optical disc players, DSP-based loudspeakers, video projectors, and scalars are unique in the industry, maintaining a super-quality digital signal throughout the path from the studio to the home, using advanced digital signal processing to deliver both a sweet, natural sound and smooth, crystal-sharp images with true cinematic realism. With the acquisition of Sooloos, Meridian now brings its expertise to the Sooloos Media System, the world's most innovative, functional and easy-to-use networked home entertainment system. Meridian Sooloos systems effortlessly combine spectacular quality, rich metadata and the industry's leading user interface to change forever the way we enjoy and interact with music.
