

Source:One

The Source:One acts as the hub of a Meridian Sooloos system and provides its audio outputs. It features both stereo RCA-type analogue and S/PDIF digital outputs for connection to your stereo or audio distribution system. In addition to having a high-quality internal DAC, the Source:One is completely fanless and has no moving parts, making it completely silent – a perfect fit in any high-end audio reproduction system.

Meridian Sooloos Source components include an integrated four-port Ethernet switch for convenient connection to other Sooloos devices and to the Internet. Ethernet connections can be made using Neutrik EtherCon connectors (supplied) or standard CAT5/5e/6 cable with RJ-45 connectors.

Because of its distributed design, a Meridian Sooloos system can support multiple Source components. Expanding your system couldn't be simpler: just add Source components to your network for additional zones.

Technical Specifications:

DIMENSIONS:

430 x 70 x 364mm / 17 x 2.75 x 14.6in (WHD)
Dimensions include non-removable feet

WEIGHT: 5.8kg (12.8lb)

AUDIO CONNECTIONS:

Analogue: 1 unbalanced stereo pair, RCA type
Digital: 1 S/PDIF coaxial digital output, RCA type

NETWORK CONNECTIONS:

4 network connections, RJ-45 or Neutrik EtherCon

POWER CONNECTIONS:

12V DC input, external AC adapter 110-230V
Removable IEC 3-prong power cable
