

ID40 Sooloos Card

PRODUCT DESCRIPTION:

The ID40 Sooloos Card is an 800 Series card, included as standard in the 808.3 Signature Reference CD Player and offered as an option in the 861 V6 Reference Digital Surround Controller. The card offers simple connection to a Sooloos system through its RJ45 style Ethernet port and renders audio streamed across that network. The host 800 Series product is then able to use its own powerful DSP capabilities to perform advanced audio enhancement processing, upsampling lower sample rate audio streams through Meridian's own upsampling techniques, and in the case of 861 apply other processing, such as Trifield, for improved presentation on a multi-channel system.

The same network connection also allows the host 800 Series product to send basic control commands back to the Sooloos Digital Media System so that from the supplied MSR+ remote control handset, or via Meridian Comms or Serial connection to the host product, a selected Play Queue can be navigated using the transport controls – Play, Pause, Stop, Track Forwards, Track Back, etc.

An ID40 Sooloos card can be specified at the time of ordering an 861 V6 or alternatively it can be retrofitted to existing 861 V6 products at a time when the customer wants to integrate a Sooloos Digital Media System with their Meridian home theatre. More comprehensive upgrades are available for older 861s and 808s so that they can also host ID40 Sooloos Card – details on these upgrades are available separately.

PRODUCT HIGHLIGHTS:

Hosted in either 808.3 or 861 V6, ID40 Sooloos Card provides the best possible audio rendering from a Meridian Sooloos system.

Use the host 800 Series product's advanced DSP to enhance the resolution of music played from your Sooloos system.

One simple wire connects your 808.3 or 861 V6 to your home network and realises the best possible results from your Meridian Sooloos Digital Media System.

Use the MSR+ to control tracks in your current Play Queue.

Modular construction and optional cards mean that every 861 V6 is individually hand-built for its owner to include the specific features required for their installation.

Retro fitable in to existing 808s and 861s when upgraded to the latest versions.

ID40

Sooloos Card

KEY FEATURES AND BENEFITS:

Hosted in either 808.3 or 861 V6 and connected via a simple Ethernet socket, the ID40 Sooloos Card presents the easiest way to link a Sooloos Digital Media System to a Meridian audio system (and vice versa) without adding extra boxes and clumsy cables.

Rendering audio streamed directly from the Sooloos Digital Media System internally and passing high-quality digital audio directly on to the 808.3 or 861 V6's digital backplane enables the realisation of the highest audio quality Sooloos solution.

Simple remote control of the current Sooloos Play Queue. Using the MSR+ remote handset gives you instant control over your Play Queue with simple functions that let you start, stop and move between tracks.

A simple all digital system – One simple wire connects your 808.3 or 861 V6 to your home network and realises the best possible audio performance from your Sooloos Digital Media System.

Launch Date: **January 2010 (CES)**

Shipping Date: **February 2010**

UK RRP: £ 1,000.00

.....

For over 10 years, Meridian's 800 Series products have offered the highest quality in audio and video reproduction. At the same time, their unique modular architecture allows each unit to be individually specified and manufactured for its owner. Modular architecture also means that as technology standards advance and new features are developed, 800 Series products can evolve – adding new features and connectivity; a service that maintains value in a customer's original investment.

The ID40 Sooloos Card is the latest option for 800 Series products. It offers the highest quality integration between Meridian and Sooloos systems. Available in the latest generation of 800 Series products, 861 V6 and 808.3, ID40 connects the host product directly to a Sooloos network enabling it to render audio streamed across the network and provide control of an active Play Queue.

Now, with the ID40 Sooloos Card, Meridian's 800 Series offers the highest quality audio delivery from a Sooloos Digital Media System.
