

# Meridian Sooloos for iPhone: Quick Guide

August 2015

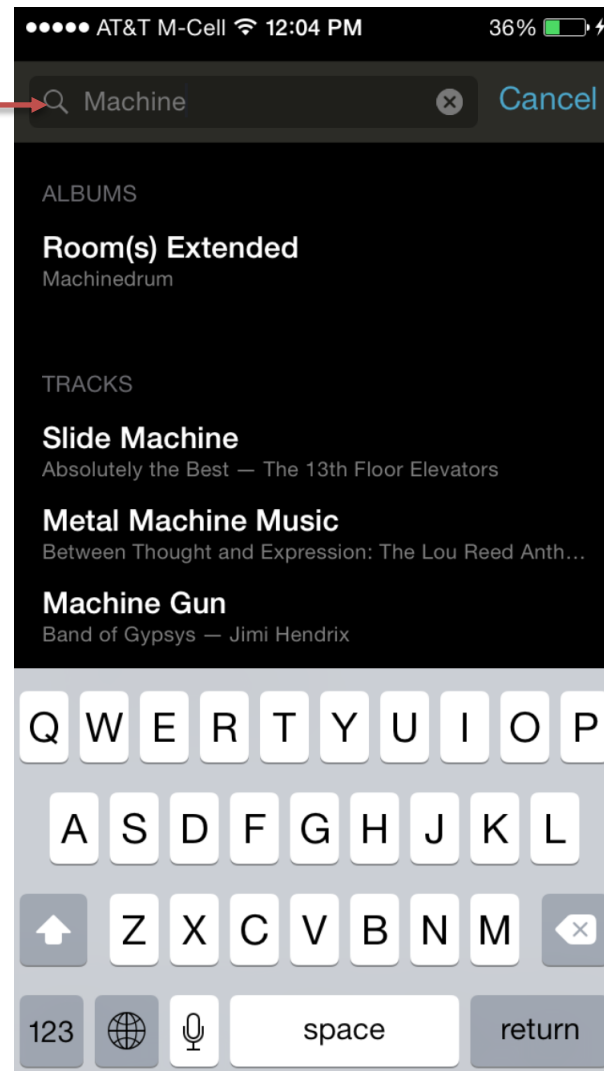

Use **Explore** to browse your library, as well as the full Rhapsody/Napster and Tidal catalogues.

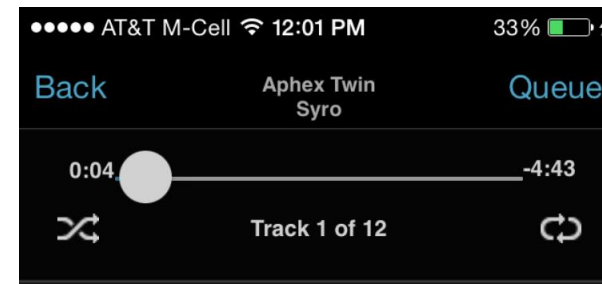

Touch the **(i)** to the left of an album or track title to launch an options menu.

From here, you can queue your music, add new online content to your library, and more.

Use **Quick Search** to quickly find a specific artist, album, or track

Touch on the desired result to bring up queuing options.

Touch on **Now Playing** to see your recently queued content's play status and artwork.

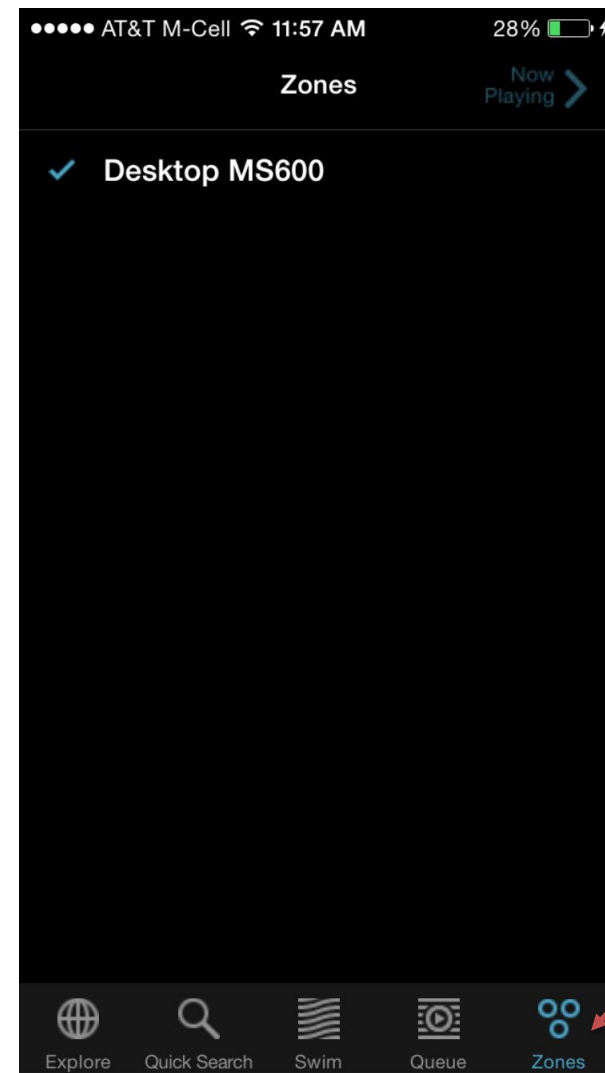

Shuffle, loop, pause, stop, skip playback, and adjust volume all from the **Now Playing** screen.

Use the **Edit** button to rearrange play order, remove tracks, or clear your play queue entirely.

The **Queue** screen shows your current play queue.

Manage play queues, playback, and volume control for each zone individually.

Use the **Zones Menu** to switch between different audio endpoint zones in your system.
