

Sooloos Media Drive 600 Recommended Hard Drives

What hard drive should I specify for use with the Meridian Media Drive 600?

Media Drive 600 is not supplied with hard disks. Instead, we recommend that retailers and installers purchase hard drives locally at the time of requirement.

At the time of launch, Meridian recommends:

- Samsung HD204UI
- Seagate ST32000542AS
- Hitachi OF12117
- Western Digital WD20EARS
- other comparable low power ("green") 3.5" SATA drives*

*(*not for use with Twinstore & Ensemble)*

We will update our recommendations on suitable HDD choices from time to time and as availability of larger capacity 3.5" SATA drives changes.

Do the drives have to be identical?

Yes - the drives have to be identical capacity though not necessarily from the same manufacturer.
