## **PRESS RELEASE For Immediate Attention**

### **Meridian Adds Prime Power Supply to Line-Up – Special Low-Noise, Highly Regulated Linear Power Supply is Perfect Partner for New Prime Headphone Amplifier**

Following the successful launch of the Prime Headphone Amplifier, Meridian has announced the introduction of the Prime Power Supply, a reference-quality, high-current design based on the new linear power supplies developed for Meridian's 800 Reference Series and specifically built for audio applications.

Built into an elegant compact metal case, designed by Meridian co-founder Allen Boothroyd, that echoes the acclaimed Meridian G Series, the Prime Power Supply has no visible screws and is double-skinned for lower noise.

The Meridian Prime Power Supply can be used to power a range of Meridian products including the Meridian Prime Headphone Amplifier, Audio Core 200, Meridian Director and Media Source 200. The addition of Prime Power Supply to these products provides an enhancement in their performance, much like supercharging a car's engine.

## Key Points for Editors

- Linear power supply design inspired by latest 800 Reference Series supply.
- Perfect partner for the acclaimed Meridian Prime Headphone Amplifier.
- High current, very low noise power supply delivers enhanced performance from a range of Meridian products including the Meridian Prime Headphone Amplifier, Audio Core 200, Meridian Director, Media Source 200, and other devices requiring a high-quality 12V power supply.
- High-mass, low-profile, low magnetic field, toroidal transformer with integral plate-mounted magnetic screen, to shield electronics from noise.
- Connect multiple devices to a single Power Supply: single wall connection minimises clutter.
- High-quality latching 3-pin mini-DIN high-current power output connectors for reliable connection.
- 5 x 12V 500mA outputs for Meridian components; USB 5V 1A output with USB input for audio pass-through – drives Meridian Director, Explorer, Prime Headphone Amplifier and i80.
- Power input filtering.
- Dual-stage regulation on all outputs, using very low noise linear regulators.
- Multiple capacitors for noise filtering; audio-grade reservoir capacitors.
- New, elegant and durable metal enclosure design by Allen Boothroyd, double-skinned for lower noise, offers the distinctive Meridian look with no visible mounting screws.
- Hand made in Meridian's state-of-the-art headquarters near Cambridge, UK.

**Meridian Prime Power Supply - UK Price: £800.00\***

**ABOUT MERIDIAN AUDIO**

Meridian Audio is based in Cambridgeshire, UK, and was founded in 1977 by psychoacoustics expert, Bob Stuart and design engineer, Allen Boothroyd. With over 35 years' history of innovation and development of uncompromised consumer home entertainment systems offering exceptional performance, this award-winning company is widely recognised as a world leader in high-quality audio and video reproduction. Meridian developed the first audiophile CD player, the world's first consumer digital surround controller, and the MLP lossless packing system included in Blu-ray Disc. The company's optical disc players, DSP-based loudspeakers, video projectors, and scalars are unique in the industry, maintaining a super-quality digital signal throughout the path from the studio to the home, using advanced digital signal processing to deliver natural sound and smooth, crystal-sharp images with true cinematic realism. In 2008, Meridian established its Automotive division and has since developed in-car entertainment systems featuring their unique Trifield technology for models including the McLaren MP12C supercar, the Range Rover Evoque, and more recently, the luxury Jaguar XJ Ultimate.
