

The Sooloos product line can be combined in many configurations to provide the storage, playback, and control to meet your needs.

In the ever-changing world of home entertainment technology, Sooloos offers a truly complete media management system that puts music and photos at your customers' fingertips.

Built on an IP network architecture and a suite of robust communication protocols, Sooloos components are forwards and backwards compatible, so your investment is safe even when new technologies and media formats come to market.

The Sooloos product line can be combined in many configurations to provide the storage, playback, and control to meet your needs.

Simple Storage and Playback

System Components: Ensemble

Description:

The most basic Sooloos system consists of simply an Ensemble. Using your home computer as a control, you can play back music in up to five zones, import CDs, import and export audio files, and back up your system to a hard drive.

Experience Award Winning Media Control

System Components: Ensemble and Control 10

Description:

Adding a Control 10 to the Ensemble allows you to experience Sooloos' award-winning touch based interface. Effortlessly load a new CD, browse your library, explore Internet-based content, create playlists, manage and edit your photos, and create slideshows on our stunning 17" touch panel control.

Two Channel Enthusiast

System Components:

Source:One, Control 20, and two Twinstores

Description:

For the connoisseur of music, combine a Source:One with two Twinstores for an astonishing 4,800 CD capacity, with mirrored backups to ensure your content is safe and always available. The Control 20 provides the same stunning user interface as the Control 10, but in a compact low-profile chassis with a 15-inch display. Its programmable volume knob and infrared remote give you optimal control of your listening experience.

Multi-Zone Distributed Audio

System Components:

Rackmounted Source:Five and Twinstore, Control 20, and Crestron Integration

Description:

Designed for integration with an audio distribution system, the rackmounted Source:Five features stereo output to five unique zones. Put the Control 20 in your primary entertaining space and use Sooloos' Crestron modules to allow your home automation products to control Sooloos in secondary zones. Hosting your Crestron XPanel program on the Control 20 means you can avoid the clutter of multiple touch panels without sacrificing control of home.

Limited Warranty

The Sooloos limited warranty is valid for a period of two years and is applicable to all Sooloos products other than the Import series, which have a one-year warranty. In all cases, the warranty is limited to the original purchaser and is non-transferable. Unauthorized modifications, improper use, and damages caused by faulty ancillary equipment, incorrect installations or environmental conditions void the warranty.

Warranty is in effect from the date of receipt of a complete customer registration. In the event that service is required, Sooloos product must be shipped in its original packaging to an authorized Sooloos service center. Replacement packaging is available upon request at an additional charge. A Return Authorization number is required and may be obtained by contacting your nearest Sooloos service center.
