Dear Marc,

Technical Bulletin

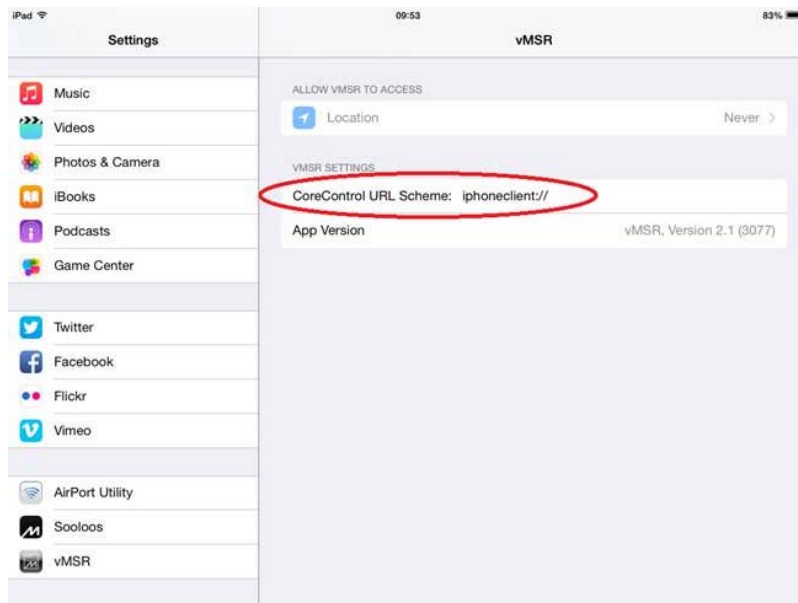

Meridian Sooloos Control - iPad App

Following the changes we've made recently to our Sooloos iOS app offerings, many users have successfully switched from the Core Control app to the newer Sooloos app for iPad. However, if the new app is used with Fast App Switching, the URL used by the third-party app will need to be updated accordingly. The new URL is:

iphoneclient://

Please take a moment to consider whether any of your customers' systems could be affected by this change - it applies to the "vMSR" app as well as other control systems which use iPad.

Here is the setting on the "vMSR" with the new URL entered:

Should you need further assistance on this matter, please feel free to contact Meridian Customer Support:
